

Pitbull 5700 Preliminary Specifications

- * 130 HP water cooled diesel. Final Tier 4
- * 65 gallon fuel tank
- * Severe duty dual element air cleaner. Available optional spinner pre-cleaner
- * Machine controls and engine controls located together for easy operator access
- * Digital engine control and monitor system with integral safety shutdown protection
- * Engine compartment, machine controls, and engine control panel fully enclosed and lockable to deter vandalism
- * Street legal LED lighting.
- * Total transport weight approx. 41K
- * Standard fifth wheel tractor trailer hitch
- * Rockwell 22.5K tandem axles including dual wheels and airbag suspension
- * 255-70R/22.5 radial tires on steel disc wheels
- * Air brakes on both axles type 30 and auto slack adjusters
- * I beam and tubular steel frame construction through out. Fully welded & gusseted
- * Onboard hydraulic landing jacks for easy hook up.
- * Travel length 47 ft Travel Height 11'8" Travel width 8' 6"
- * Hydraulic direct drive 10' x 7' screen box with 2 decks.
- * Grizzly bars on top deck as standard. Second deck open as standard
- * Rubber spring system
- * 120 mm greaseable shaker shaft bearings
- * Conveyors are roller bed design using unequal troughing rolls with greaseable pillow block bearings on head and Tail pulleys. 2-15/16" diameter pulley shafts. Lagged 16" head pulleys.
- * Both conveyors utilize 5 inch "CEMA "C" rollers
- * Wing 10" tail pulley on transfer conveyor. Herringbone 12" tail pulley on stacking conveyor
- * Transfer conveyor 12'7" working length
- * Stacking conveyor is 38'4" long and folds hydraulically for transport. Tip Ht. 13'
- * Standard 3 ply 60 inch wide smooth belts
- * Plant is totally hydraulic driven with thermostatically controlled oil cooler
- * Cyclone hydraulic reservoir. In line spin on filter assembly
- * Danfoss variable displacement piston hydraulic pump
- * Danfoss control valve and Danfoss gear-roller style conveyor motors
- * Permco hydraulic motor on shaker table drive
